Date Type

Select one of the data types below:

- ☐ None Selected
- ☐ Auto Number
- ☐ Formula
- ☒ Roll-Up Summary
- ☐ Lookup Relationship
- ☐ Master-Detail Relationship
- ☐ External Lookup Relationship
- ☐ Checkbox
- ☐ Currency
- ☐ Date

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

The screenshot displays the 'New Lightning App' configuration window in Salesforce. The interface is clean and modern, with a light grey background. On the left, a sidebar shows the navigation menu with options like 'App', 'Data', 'Maps', 'Apps', 'Components', 'External Services', 'Lightning', and 'Mobile'. The main area is titled 'New Lightning App' and contains two primary sections: 'App Details' and 'App Branding'. The 'App Details' section includes input fields for 'App Name' (filled with 'My_App'), 'Developer Name' (filled with 'My_App'), and a 'Description' field (empty). The 'App Branding' section features an 'Image' upload area (showing a blue square with a white 'M'), a 'Primary Color Hex Value' field (filled with '#0070C2'), and a checkbox for 'Org Theme Options' (unchecked). Below these is an 'App Launcher Preview' showing a blue button with 'My' and a grey button with 'My_App'. A 'Next' button is located at the bottom right of the configuration window. At the bottom of the screen, a table lists the components of the app, including 'Queue Management', 'Sales', and 'Lightning Sales', with their respective descriptions and dates.

Fields & Relationships

Relationships

- ☐ Lookup Relationship
Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
- ☐ Master Detail Relationship
Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create rollup summary fields on the master record to summarize the detail records.The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.
- ☐ External Lookup Relationship
Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Field Types

- ☐ Checkbox
Allows users to select a True (checked) or False (unchecked) value.
- ☐ Currency
Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- ☐ Date
Allows users to enter a date or pick a date from a popup calendar.
- ☐ Date/Time
Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- ☒ Email
Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email from that contact's email addresses cannot be used for mass emails.
- ☐ Geolocation
Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distances.
- ☐ Number
Allows users to enter any number. Leading zeros are removed.
- ☐ Percent
Allows users to enter a percentage number, for example, "10" and automatically adds the percent sign to the number.
- ☐ Phone
Allows users to enter any phone number. Automatically formats it as a phone number.
- ☐ Picklist
Allows users to select a value from a list you define.
- ☐ Picklist (Multi-Select)
Allows users to select multiple values from a list you define.
- ☐ Text
Allows users to enter any combination of letters and numbers.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, "10" and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Allows users to enter up to 255 characters on separate lines.

Allows users to enter up to 131,072 characters on separate lines.

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

Allows users to enter any combination of letters and numbers and store them in encrypted form.

Allows users to enter a local time. For example, "2:40 PM", "14:40", and "14:40:00" are all valid times for this field.

Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Custom Object Definition Edit **Save** **Save & New** **Cancel**

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label **Example:** Account

Plural Label **Example:** Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name **Example:** Account

Description

Context-Sensitive Help Setting

☒ Open the standard Salesforce.com Help & Training window

☐ Open a window using a Visualforce page

Content Name

Enter Record Name Label and Format

The Record Name appears in most sources, including related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Setup > OBJECT MANAGER

Customer

Details:

- Fields & Relationships
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules

Sub-Process Step

Specify the type of information that the custom field will contain.

Data Type

Select one of the data types below:

- ☐ None Selected
- ☐ Auto Number
- ☐ Formula
- ☐ Roll-Up Summary
- ☐ Lookup Relationship
- ☒ Master-Detail Relationship
- ☐ External Lookup Relationship

Master-Detail Relationship

- Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create roll-up summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Setup > OBJECT MANAGER

Customer

Details:

- Fields & Relationships
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules

Customer

New Relationship

Step 6: Add custom related lists

Field Label: Bank
Data Type: Master-Detail
Field Name: Bank
Description:

Specify the title that the related list will have in all of the layouts associated with the parent:

Related List Label: Customer

These are the page layouts that will include this field. Because this is a Master-Detail relationship, the field is required:

Add Related List: Page Layout Name

- ☒ Bank Layout

☒ Append related list to users' existing personal customizations

Browser tabs: WhatsApp, Job Profile, Flows | Salesforce, Flow Builder, Lightning Experience | Sales.
